

VOTE by VOICE CALL

Process Overview

1. If you are unable to use the smartphone voting option, you can opt-in for this voting method by noting that you would like to vote by telephone when that prompt appears in the convention registration process.
2. During the voting window, a Voatz team member will call you to start the Vote by Voice process:
 - a. **You will need to provide your voting credentials (Verification Key, Voter ID) as received in your Voting Invitation Email.**
 - b. Following confirmation of these credentials, the call will proceed as follows:
 - i. The Voatz team member who has called you will prompt you to provide your choices for the various contests, one by one. *You may be requested to state each choice twice — as a means of double verification.*
 - ii. The Voatz team member will simultaneously record your choices on a tablet running the Voatz Event Manager (VEM) application.
 - iii. The Voatz team member will then confirm all selections with you and then submit the ballot.
 - iv. Then, the Voatz software will then generate an email receipt of your cast ballot. The team member will provide you the ballot receipt password to unlock the receipt.
 - v. You are then encouraged to open the receipt and verify your selections.
